

PRODUCT SUBMITTAL SHEET

Hamilton Drywall Products cornerbead and trims are manufactured using prime galvanized steel with knurled and punched flanges producing maximum bond and adhesion to joint compound .

Manufactured with (0.0125) inch-thick steel for strength and protection.

Zinc plated (Galvanized) for corrosion resistance.

Multi-stage roll forming process for consistent, straight corners.

Bare Metal trims can be nailed, stapled, screwed or clinched into place. Paper Faced Tape-on trims can be applied by embedding tape flanges with All Purpose Joint Compound.

Bare Metal and Paper Faced trims manufactured by Hamilton Drywall Products meet ASTM-C1047.
